

life after brain injury pdf

Traumatic brain injury (TBI), also known as intracranial injury, occurs when an external force injures the brain. TBI can be classified based on severity, mechanism (closed or penetrating head injury), or other features (e.g., occurring in a specific location or over a widespread area). Head injury is a broader category that may involve damage to other structures such as the scalp and skull.

Traumatic brain injury - Wikipedia

I'm 4.5 years post my brain injury: swelling of the brain, seizures, global damage affecting all areas of my life. The official term is encephalopathy, I think.
