light without shadow the pdf

A shadow is a dark area where light from a light source is blocked by an opaque object. It occupies all of the three-dimensional volume behind an object with light in front of it. The cross section of a shadow is a two-dimensional silhouette, or a reverse projection of the object blocking the light.

Shadow - Wikipedia

1 A Clean, Well-Lighted Place (1933) / Ernest Hemingway It was very late and everyone had left the café except an old man who sat in the shadow the leaves of the tree made against the electric light.

Darkness, the polar opposite to brightness, is understood as a lack of illumination or an absence of visible light.. Human vision is unable to distinguish color in conditions of either high brightness or darkness. In conditions with insufficient light levels, color perception ranges from achromatic to ultimately black.. The emotional response to darkness has generated metaphorical usages of ...
