Managerial Accounting: Tools for Business Decision Making

Chapter 17 is an introduction to managerial accounting. Managerial accounting relates to reporting internal to an organization, and is far less structured than the rules-based system applicable to financial (external) reporting.

Chapter 17: Introduction to Managerial Accounting

One simple definition of management accounting is the provision of financial and non-financial decision-making information to managers. According to the Institute of Management Accountants (IMA): "Management accounting is a profession that involves partnering in management decision making, devising planning and performance management systems, and providing expertise in financial reporting and ...

Management accounting - Wikipedia

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...
