vitality of modern day Markov processes and controlled Markov chains. The maturity can be seen from the sophistication of the theorems, proofs, methods and algorithms contained in the selected papers. The vitality is manifested by the range of new ideas and new applications in such fields as finance and manufacturing.

For controlled Markov diffusion processes on  $n$ - dimensional euclidean space, the dynamic programming equation becomes a nonlinear partial differential equation of second order, called a Hamiltonian

tinuous time Markov processes and to the theory of viscosity solutions. We approach stochastic control problems by the method of dynamic programming. The fundamental equation of dynamic programming is a nonlinear evolution equation for the value function. For controlled Markov diffusion processes on

### **Controlled Markov Processes and Viscosity Solutions**

A rather elementary introduction to dynamic programming for controlled Markov processes is provided in Chapter III. This is followed by the more technical Chapters IV and V, which are concerned with controlled Markov diffusions and viscosity solutions of HJB equations.

This book is intended as an introduction to optimal stochastic control for continuous time Markov processes and to the theory of viscosity solutions. Stochastic control problems are treated using the dynamic programming approach. The authors approach stochastic control problems by the method of dynamic programming.

### **Controlled Markov Processes and Viscosity Solutions**

In parallel, the theory of controlled Markov chains (or Markov decision processes) was being pioneered by control engineers and operations researchers. Researchers in Markov processes and controlled Markov chains have been, for a long time, aware of the synergies between these two subject areas.

RATIONALLY INATTENTIVE CONTROL OF MARKOV PROCESSES EHSAN SHAFIEEPOORFARD y, MAXIM RAGINSKY , AND SEAN P. MEYNz Abstract. The article poses a general model for optimal control subject to information con-straints, motivated in part by recent work of Sims and others on information-constrained decision-making by economic agents.
