

master data management and pdf

Master data represents the business objects that contain the most valuable, agreed upon information shared across an organization. It can cover relatively static reference data, transactional, unstructured, analytical, hierarchical and metadata. It is the primary focus of the information technology (IT) discipline of master data management (MDM).. Master data is usually non-transactional in ...

Master data - Wikipedia

The Master Data Management Summit is co-located with the Data Governance Conference and is Europe's only co-located conferences on MDM & Data Governance.

Master Data Management Summit Europe - IRM UK

Concept. The concept of data management arose in the 1980s as technology moved from sequential processing (first cards, then tape) to random access storage. Since it was now possible to store a discreet fact and quickly access it using random access disk technology, those suggesting that data management was more important than business process management used arguments such as "a customer's ...
