The Quest of the Silver Fleece was W.E.B. Du Bois' first novel. Published in 1911 by A.C. McClurg & Co. of Chicago, the novel combined literary realism with some romanticism and political-economic analysis to provide a story of two Black protagonists, a man and a woman, who eventually work together to build an economic community -- a community that provided a way to overcome both the overt and ...

Nanotechnology is rapidly growing by producing nanoproducts and nanoparticles (NPs) that can have novel and size-related physico-chemical properties differing significantly from larger matter []. The novel properties of NPs have been exploited in a wide range of potential applications in medicine, cosmetics, renewable energies, environmental remediation and biomedical devices [2-4].

Silver nanoparticles: synthesis, properties, toxicology

$5 \text{ \AA} \leq \lambda \leq 2 \text{ \AA}$ (2.3) where g is the strain, q is the angle of the oscillation die, and a is the cone angle. This instrument measures viscoelastic properties of the compounds using sinusoidal deformation. The $\tan \delta$ and dynamic viscosity were measured at various temperatures and

Struktol Company of America

FiveThirtyEight, sometimes rendered as 538, is a website that focuses on opinion poll analysis, politics, economics and sports blogging. The website, which takes its name from the number of electors in the United States electoral college, was founded on March 7, 2008 as a polling aggregation website with a blog created by analyst Nate Silver. In August 2010, the blog became a licensed feature ...

Phos-tag[®] is... Phos-tag[®] is a functional molecule that binds specifically phosphorylated ions. Features Selectivity of binding of a phosphate ion (2-) is much higher than that of other anions. A stable complex is formed under physiological conditions (pH 5 to 8). In case of Zn²⁺ is used as M²⁺.

Methods and Applications in Fluorescence focuses on new developments in fluorescence spectroscopy, imaging, microscopy, fluorescent probes, labels and (nano)materials. It will feature both methods and advanced (bio)applications and accepts original research articles, reviews and technical notes.

Methods and Applications in Fluorescence - IOPscience

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

This review presents various chromatographic systems, TLC, HPLC, GC, and also SFC, developed for identification and accurate quantification of long-chain mono- and polyunsaturated fatty acids from different samples with emphasis on selected literature which was published during last decade. Almost all the aspects such as pre-separation step of fatty acids (cis and trans), stationary phase ...

Chromatographic Methods in the Separation of Long-Chain

Fig. 2 shows the general principle of an ethane (C₂H₆)/ethylene (C₂H₄) FT membrane system consisting of an aqueous solution of silver nitrate (AgNO₃) transported by capillarity in a microporous membrane. At high pressure, C₂H₄ reacts with silver ion (Ag⁺) to form a complex component named silver-ethylene ion, which diffuses freely across the membrane.

Ethane/ethylene and propane/propylene separation in hybrid

We have noticed increasing interest in the development of paper-based sensing platforms in the past few years. This phenomenon can be attributed to numerous advantages of this simple cellulosic substrate; these are summarized in Table 1.

Sensing approaches on paper-based devices: a review
