Abiogenesis, or informally the origin of life, is the natural process by which life arises from non-living matter, such as simple organic compounds. The transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular self-replication, self-assembly, autocatalysis and cell membranes.

The question of origins is plainly a matter of science historyâ€™not the domain of applied science. Contrary to the unilateral denials of many evolutionists, oneâ€™s worldview does indeed play heavily on oneâ€™s interpretation of scientific data, a phenomenon that is magnified in matters concerning origins, where neither repeatability, nor observation, nor measurementâ€™the three immutable ...
