Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

3.2. A basic overlapping-generation Bewley model. The infinite horizon Bewley model does not account for the heterogeneity that arises from the life cycle, which is an important source of heterogeneity in wealth because people typically enter the labor market with little to no assets and then gradually accumulate them, at least until retirement age.
