Low back pain is one of the most common health problems and creates a substantial personal, community, and financial burden globally (1-4). As part of estimating the global burden of low back pain, with low back pain defined as "activity-limiting low back pain (with or without pain referred into 1 or both lower limbs) that lasts for at least 1 day", country-specific prevalence data were required.

A systematic review of the global prevalence of low back

Conclusion Capability analyses are frequently reported as part of an ongoing quality program though, in many instances, statistics are merely reported and an insufficient amount
