Targeted temperature management (TTM) previously known as therapeutic hypothermia or protective hypothermia is an active treatment that tries to achieve and maintain a specific body temperature in a person for a specific duration of time in an effort to improve health outcomes during recovery after a period of stopped blood flow to the brain. This is done in an attempt to reduce the risk of ...

So, there is a continuity of human life from a surplus cell which a human produces by the millions each day, to the pre-embryo. Theoretically, these stem cells can be used to develop into replacement organs (heart, liver, pancreas, skin, etc) Therapeutic cloning has not yet been accomplished in the laboratory or clinic.

Bathing is the washing of the body with a liquid, usually water or an aqueous solution, or the immersion of the body in water. It may be practiced for personal hygiene, religious ritual or therapeutic purposes. By analogy, especially as a recreational activity, the term is also applied to sun bathing and sea bathing.. Bathing can take place in any situation where there is water, ranging from ...

Summary. This scientific review report is limited to the review of safety concerns surrounding zinc oxide (ZnO) and titanium dioxide (TiO<sub>2</sub>) nanoparticles (NPs) present in sunscreens. The two main issues considered in this review are the evidence for the ability of these NPs to penetrate the skin to reach viable cells and the potential toxicity exerted by them.
